Specialty  
Gases

# Supagas difference

Supagas is a 100% Australian owned company supplying a complete range of gases and services Australia wide.

The company delivers bottled gases, bulk liquid gases and specialty gases from state-of-the-art manufacturing and laboratory facilities.

Supagas was started generations ago by three brothers racing around Melbourne delivering gas better than anyone else.

That competitive spirit still drives the company as it expands into new markets. The family is still very much hands on.

Most recently, the company is proud to be supporting the mining, oil and gas industries in remote parts of the country.

Our competitive advantage is based on reliable delivery, fast and personal responses to queries and outstanding customer service. These are keys to the Supagas difference.

## Our can-do attitude

**Supagas is famous for it's can-do attitude. Exceptional customer service underpins every part of our business.**

We've grown through teamwork and a strong sense of personal responsibility.

We seek to anticipate customer demands, we remain flexible and we are prepared for the unexpected.

Supagas is the industrial gas company that turns challenges into solutions – whether it's down the road or across the nation.

## Specialty gases and equipment

Supagas manufactures and supplies a wide range of specialty gas mixes. This includes high and ultra-high purity grade (99.999%) gases which are used by a wide range of different industries.

Gases are supplied for use in scientific and engineering processes, for stainless steel and specialised welding, instrument calibration, food processing and laser cutting – right through to cooling electrical generators in power stations.

All cylinders filled with specialty gas mixtures are fully vacuumed before refilling. Our calibration is done to the best international standards and we can offer a Certificate of Analysis for all our specialty gases.

We are able to supply custom gas mixtures on short notice with direct customer access to our laboratory technicians. It means we are able to respond quickly to orders and technical queries.

We are geared to provide solutions without the red tape and delays demonstrated by our larger competitors. Our prices are competitive and our deliveries are responsive and designed to meet regular and urgent demands.

**Supagas supply a full range of gas control equipment to suit most scientific and research applications.**

We are able to supply specialty gas regulators, gas reticulation systems, cylinder trolleys and restraints, hoses, fittings, flash back arrestors (for flammable and oxidising gases) and a whole range of safety products. We'll even deliver them to you free of charge with your gas order.

**The Supagas difference is personal and direct.**

## Supagas Values

### Quality Assurance

Supagas Pty Ltd is committed to comply with the requirements of ISO 9001-2008 and to continually improve the effectiveness of our Quality Management System.

We review the Quality Management System and the quality policy on a regular basis to ensure effectiveness and suitability to the organisation.

Everyone at Supagas understands we must provide a safe environment for both our employees and the wider community. We are therefore committed to implement and maintain a continual improvement approach throughout the organisation whilst also meeting all applicable statutory and regulatory requirements relevant to our field of supply.
