

LIBERTY NEBULISER PUMP

The **Liberty®** Nebuliser Pump is the product of 20 years of extensive research and development to provide the patient with the most cost effective, versatile and reliable pump on the market.

The **Liberty®** Nebuliser Pump has been designed with high performance as a priority. From the air intake filter through to the nebuliser bowl, nothing has been left to chance. The motor and precision pump assembly allows continuous operation without the annoying short-term usage times or cool down periods associated with similarly priced pumps. Use it whenever you want, how often you want and for how long you want.

Having a compact and contemporary design, the **Liberty®** Nebuliser Pump is a quality product suitable for use with a wide variety of medications recommended by your doctor for the treatment and/or relief of respiratory complaints.

Aerosol therapy is one of the methods of drug delivery for the treatment of chronic and acute pulmonary disease. This form

of treatment is increasingly favoured by both family doctors and specialists since it achieves maximum drug efficiency directly in the respiratory tract thus minimising possible side-effects.

The **Liberty®** aerosol therapy system incorporates an oil free compressor. Combined with the performance of the **RAPIDFLAEM2** jet nebuliser (2.7-3µm) and a full set of accessories including mask, mouth piece and nasal prongs, the **Liberty®** Nebuliser Pump is a high quality system, making it suitable for basic care and seasonal allergic pathologies.

The **Liberty®** Nebuliser Pump has a patented anti-vibration system offering a silent and vibration-free operation. The case is moulded from thermoplastic resins, has robust features, a handy carry handle and a large accessory compartment which is hygienically separated from the cord storage compartment.

WEIGHT:	2.1 KG
WARRANTY:	2 YEARS
HIGH QUALITY MAINTENANCE FREE COMPRESSOR	
HIGH EFFICIENCY FILTER	
APPROVALS:	TGA ARTG NO. 92850 CLASS LLA

Useful Information

- Nebuliser bowls are disposable and need to be replaced regularly. Replace your jet nebuliser bowl every 6 months and always keep a spare in case of breakage or loss.
- Bowls should also be rinsed after each use, washed in warm water daily and allowed to dry naturally and stored in an airtight container.
- Once a week the mask, mouthpiece and bowl should be soaked in a disinfectant such as Nebuclean.

The Liberty Health Seal of Quality ensures that the product you purchase is free from manufacturing or material faults and has a performance that you would expect for use by a health care professional. If you find any product carrying this symbol to be defective or unsuitable, please return it to the place of purchase for replacement or refund.
